# Insurance Mass Market – Journey Roadmap

Building the Digital Advantage to Win in Mass Market

March 10, 2026

Manulife

INTERNAL

# Executive Summary

**Recall: Manulife's mass market for Individual Insurance and Guaranteed Wealth is a critical growth segment**, however current journeys are manual, fragmented, and friction-heavy—impacting efficiency, satisfaction, and scalability.

**In this Mass Market Journey Roadmap we set out to:**

- Identify IIC's future state service mapping that will enable a scalable Mass Market growth strategy.
- Reimagine advisor and client journeys to unlock efficiency, digital enablement, and competitive advantages.
- Put a Low-touch/No-touch experience at the core of our future state

## Where we focused our review:

- **Advisor & Client Journey Redesign:** Identified friction points and mapped future-state flows to enable speed, simplicity, and scale.
- **Digital-First Growth Model:** Defined automation and integration opportunities to reduce manual work and improve advisor productivity.
- **Competitive Positioning:** Assessed gaps vs. market leaders and outlined big bets required to win in the highly transactional Mass Market segment.

## Key take-a-ways

- **Our current experience is a growth blocker:** Manual, fragmented processes create friction that undermines advisor productivity and client satisfaction—costing us share even as demand rises.
- **Digital enablement is a strategic imperative:** These gaps aren't just operational inefficiencies; they directly impact competitiveness and advisor trust. Closing them is critical to scale and to position Manulife as the market leader.
- **Big bets identified by journey**: Through deep review of onboarding, insurance, and wealth journeys, we pinpointed high-impact investments—automation, integrated tools, and advisor-centric design—that begin to close competitive gaps and position Manulife to win in Mass Market.

# The Imperative: Compete to Win in Mass Market

## The Opportunity:

- $30–$40B protection gap in Canada represents a massive unmet need for life and health coverage.
- 42% of households lack adequate insurance, creating a high-volume growth segment.
- Manulife's low MM share positions us to capture significant upside if we act decisively.

## The Challenge:

- Manual, fragmented journeys slow advisors and frustrate clients—eroding share despite strong sales potential.
- Competitors are investing in digital-first models, raising the bar for speed, simplicity, and scale.
- Advisor confidence is at risk without modern tools and frictionless experiences.

## Our Strategic Response:

- Anchor on low-touch/no-touch design to enable scalable, cost-effective growth.
- Invest in big bets by journey—automation, integrated tools, and advisor-centric UX to close competitive gaps.
- Position Manulife as the market leader through a unified, digital ecosystem that drives productivity and trust.

Manulife

*This gap is commonly referred to as the **"life insurance protection gap"**, and industry commentary often cites figures in the **$30–$40 billion range** for unmet needs. https://www.chia.ca/facts

INTERNAL

# Who We Serve —and Why It Matters for Growth

## Who we are targeting with this service mapping

- **Transactional advisors** focused on straightforward insurance and investment solutions.
- **Clients seeking simple, fast outcomes**—not complex planning or high-touch servicing.

## Product parameters to consider:

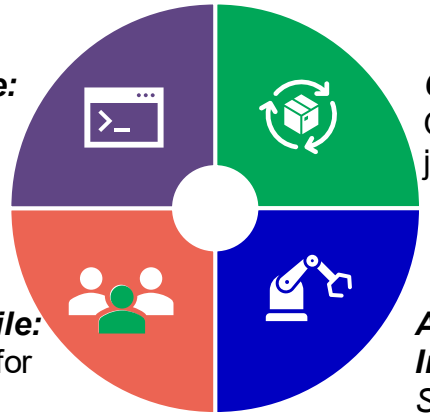
- **Insurance:** Term coverage < $1M or Par coverage < $250K.
- **Guaranteed Wealth:** Clients with < $100K investable assets

## Common Design Principles for Every Journey:

Every initiative in this roadmap reinforces these four experience principles:

***First-Time-Right Intake:*** Eliminate rework and paper.

***Consistent Digital Ecosystem:*** One intuitive experience across journeys.



***Unified Identity & Profile:*** Transparency and trust for advisors and clients.

***Automated Decisioning & Instant Fulfillment:*** *Speed and scale through task automation.*

Manulife

# How Our Experience Principles Translate Across Journeys

These four design principles are the foundation of every future-state journey. Here's how they begin to take shape in Onboarding, Insurance, and Guaranteed Wealth—setting the stage for the initiatives that follow.

| Principle | Onboarding | Insurance | Guaranteed Wealth |
|---|---|---|---|
| **First-Time-Right Digital Intake** | **Enable advisors to complete onboarding in one guided flow** with real-time validation and instant access—no re-entry or follow-ups. | **Guide advisors to capture all client and product details in one seamless process**, ensuring zero additional info after submission. | **Allow advisors to submit client and investment details once**, with data flowing digitally—no paper or redundant steps. |
| **Automated Decisioning & Instant Fulfillment** | **Run compliance and licensing checks automatically** to activate advisor access immediately after clearance. | **Move standard cases from submission to inforce policy in real time** through automated underwriting and instant issuance. | **Complete contracts and fund setups automatically post-submission**, delivering confirmations and documents instantly. |
| **Consistent, Task-Based Digital Ecosystem** | **Provide advisors with a unified portal** featuring intuitive navigation, embedded guidance, and dashboards for predictable onboarding. | **Standardize insurance tools with consistent design and workflows**, reducing complexity and enabling quick transactions. | **Mirror investment workflows to insurance patterns**, creating familiarity and efficiency across all journeys. |
| **Client-Centric Digital Identity & Unified Profile** | **Give advisors a single dashboard to view all client relationships** and manage their book of business holistically. | **Offer clients one view of all policies and coverage**, while enabling advisors to support proactively with full transparency. | **Show clients a consolidated view of investments and household holdings**, empowering advisors to identify opportunities and guide growth. |

# Digital Gaps Are Costing Us Share—and Advisor Confidence

Competitors are raising the bar. Our fragmented tools and high-touch processes erode trust and limit scale. Closing these gaps is non-negotiable for winning in the Mass Market.

## Our Reality:

Manulife's digital capabilities lag industry benchmarks, impacting advisor trust and growth.

**Competitive Benchmark**: Digital tools are among the top 4 drivers of advisor perception (APS) .

- **Current APS Scores:** Online tools (7.5 vs iA 8.1), Digital new-business apps (7.7 vs iA 8.3). Overall ranking: #5.
- **Advisor Feedback:** Not easy to navigate site, not intuitive, broken links, messenger feature not working as intended.

**Insurance Challenges:**

- **Market share Loss:** 1 pt MM share YoY, 4 pts QoQ despite +20% YoY sales*.
- **Digital misalignment**: Fragmented quoting tools and missing features (Vitality, InsureRight).
- **Advisor frustration**: session timeouts, broken navigation.

**GWS Challenges:**

- **Market share erosion**: Down 2 pts YoY while competitors like iA gained share through superior digital experiences*.
- **Execution backlog**: 40% of OLT capabilities remain offline, slowing advisor adoption and delaying scale.
- **Digital gap**: iA offers 85% end-to-end digital submission in 9 minutes; Manulife ranks below average on digital tools and access..

## Where We're Falling Behind—and How We Fix It

Our Mass Market share is slipping despite strong sales potential. Competitors are winning on speed and simplicity—our gaps in digital execution must be closed to restore advisor confidence and enable scale.

**Biggest Bets to Close Gaps**

To compete and grow, we must make strategic investments:

- **Digitize High-Volume Transactions**: Eliminate paper and manual steps for contracts and deposits—speed sales and reduce advisor frustration.
- **Modernize Advisor Portal**: Redesign navigation and quoting for intuitive, task-based workflows that boost productivity.
- **Integrate Tools into One Ecosystem**: Merge fragmented systems into a unified experience—no more multiple logins or redundant data entry.
- **Deliver Mobile-First Client Portal**: Enable omni-channel self-service for clients—reduce advisor support burden and improve satisfaction.

**Closing these gaps is the foundation for low-touch/no-touch scale—and for winning advisor trust.**

INTERNAL

# Mass Market Advisor Onboarding Journey

# **Transforming MM Advisor Onboarding:** To highlight key pain points in the advisor onboarding journey, uncover strategic opportunities for improvement, and present high-impact initiatives

## Biggest Barriers

- **Fragmented Systems & Manual Processes:** Multiple logins, manual submissions, and redundant data entry across portals. Delays in license validation and entitlement setup. Scattered training materials and lack of centralized CE tracking.
- **Low Visibility & Misalignment:** MGAs lack visibility into advisor progress, CE status, and compensation. Misaligned entitlements and overrides between Manulife and MGAs.
- **High NIGO (Not In Good Order) :** Primarily driven by manual data entry, outdated forms, and fragmented workflows while filling application for contracting. These issues lead to incomplete documentation, regulatory non-compliance, and delays in processing, ultimately impacting MGAs/advisor satisfaction and operational efficiency.
- **Confusion Around Support Channels:** Advisors unsure whether to contact Manulife or MGA for help. Poor communication loops and unclear escalation paths.

## Opportunities

- **Centralized Onboarding Hub:** A digital platform consolidating training, CE credits, product education, and onboarding checklists. Streamlining onboarding with digital tools and automated validation set advisors up for long term growth with us.
- **Unified Advisor Experience:** Simplified onboarding journeys and dashboards for both MGAs and advisors. Role-based views to reduce duplication and improve clarity.
- **Smart Automation:** AI-guided tutorials, smart forms/search, and automated CE credit syncing. Real-time compliance dashboards and milestone notifications.
- **Integrated Marketing & Sales Tools:** Shared marketing hubs with content and campaign coordination. Seamless access to  engagement tools.

## Our Big Bets

- **Single Background Check & Automated License Validation:** This feature streamlines onboarding by consolidating multiple verification steps into one seamless process. Advisors can securely submit their credentials, while the system automatically validates licenses against regulatory databases saving time, reducing errors, and ensuring up-to-date compliance.
- **Centralized Advisor Dashboard - AP**: Design to bring all key advisor functions into one intuitive interface, this dashboard offers real-time visibility into client activity, compliance status, communications, and performance metrics. Advisors can manage tasks, track progress, and access essential tools, all from a single, organized hub that enhances productivity and decision-making.
- **Support Hub with Defined Roles & Feedback Loops**: Clear routing for support requests and integrated feedback mechanisms to improve retention and engagement.
- **AP Redesign:** A refreshed interface and intuitive navigation, the portal empowers advisors to work more efficiently, stay organized, and deliver personalized support.

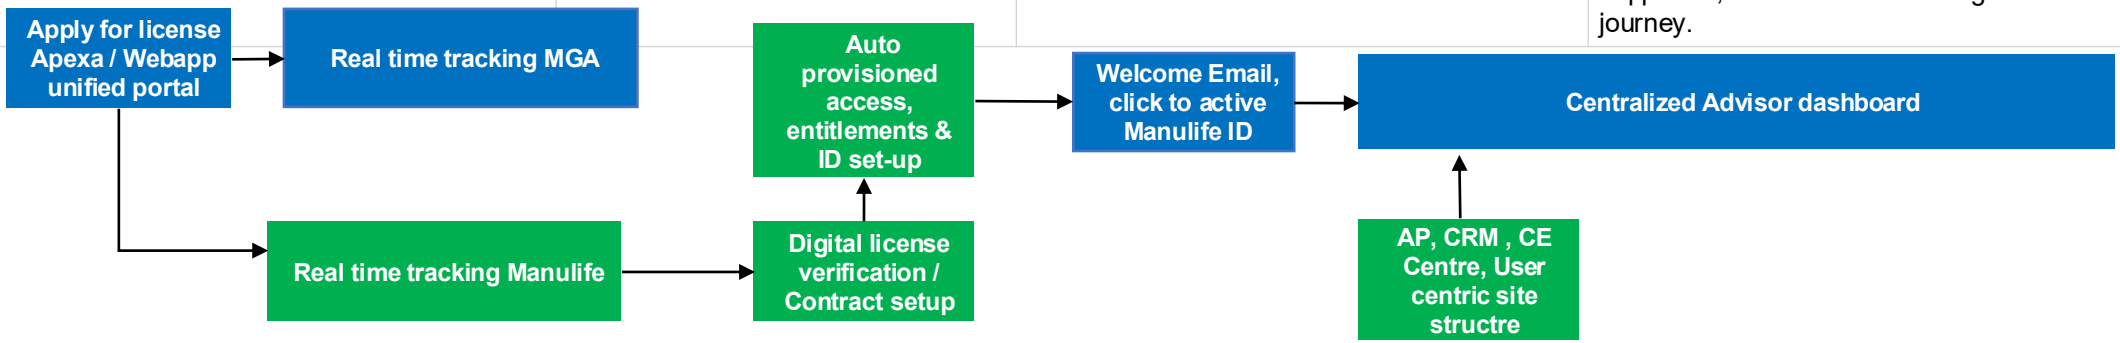
# MM Advisor Onboarding Blueprint

User engagement point

Backstage action

| Phases | Awareness & Recruitment | Contracting & Licensing | Onboarding & Training | Enablement & Engagement |
|---|---|---|---|---|
| **Advisor interaction** (frontstage) | Discover Manulife through co-branded MGA/National Account campaigns. | Register through a simplified APEXA / WebApp onboarding kit with tutorials. | Access a centralized onboarding hub with product and CE training. | Advisors receive warm leads, join peer learning communities, earn recognition, track progress via dashboards, and access support through a shared hub—ensuring clarity, connection, and continued growth. |
| **Future State** | Apply via a unified recruitment portal with real-time status tracking. Participate in a single virtual interview day with Manulife, MGA, and NA reps.<br>Access pre-interview guides and commission breakdowns via portal. | Submit licensing and background checks via integrated digital tools. Receive milestone notifications (e.g., “License Verified!”).<br>Get auto-provisioned access and entitlements within hours. | Follow tailored onboarding checklists for setup and compliance. Receive automated CE credit tracking and completion updates. Use embedded tutorials and activity monitoring to close training gaps. | Advisors receive warm leads based on CRM insights, engage in business development through a targeted practice management hub, and earn recognition via tiered programs. Advisors can track progress through performance dashboards and access support through a shared hub with clear routing. Behind the scenes, automated lead matching, milestone tracking, and integrated feedback loops ensure advisors stay informed, supported, and connected throughout their journey. |

**Process map**



**High Priority Initiatives**

- Digital Licensing Verification & Auto-Provisioning
- Dynamic eApp & Shared Application Tracker
- Learning Hub with Real-Time CE Tracking
- Support Hub with Defined Roles & Feedback Loops

INTERNAL

# MM Advisor Onboarding Blueprint

| Phases | Awareness & Recruitment | Contracting & Licensing | Onboarding & Training | Enablement & Engagement |
|---|---|---|---|---|
| **Advisor interaction** (frontstage) | Discover Manulife through co-branded MGA/National Account campaigns. | Register through a simplified APEXA / WebApp onboarding kit with tutorials. | Access a centralized onboarding hub with product and CE training. | Advisors receive warm leads based on CRM insights, engage practice management, earn recognition through tiered programs, track progress via dashboards, access support through a routed hub, share feedback via the portal, and have clear escalation contacts. |
| **Orchestration Layer (Backstage actions)** | Apply via a unified recruitment portal with real-time status tracking. Participate in a single virtual interview day with Manulife, MGA, and NA reps.<br>Access pre-interview guides and commission breakdowns via portal. | Submit licensing and background checks via integrated digital tools.<br>Receive milestone notifications (e.g., “License Verified!”).<br>Get auto-provisioned access and entitlements within hours. | Follow tailored onboarding checklists for setup and compliance. Receive automated CE credit tracking and completion updates. Use embedded tutorials and activity monitoring to close training gaps. | CRM analytics aid advisors with leads based on client portfolio insights, while automated systems track milestones and deliver recognition. A digital community platform supports continuous practice management growth, smart routing directs support queries between MGA and Manulife, and embedded feedback tools enable continuous improvement through the advisor portal. |
| **Gaps to Fill** | Implement a unified recruitment platform with real-time tracking and shared access for MGAs and Manulife. Provide advisors with transparent commission structures and onboarding timelines before interviews. | Automate license verification and entitlement provisioning via API between MGA and Manulife.<br>Embed onboarding tutorials and checklists into welcome communications. | Launch a centralized advisor hub with CE credit tracking and product education. Provide tailored onboarding checklists and role-based dashboards for advisors and MGAs. | Lead distribution to be centralized and driven by advisor readiness, recognition and milestone tracking will be automated and structured, peer learning to be supported by a robust digital platform, support routing and escalation paths will be clearly defined, and feedback will be continuously captured and acted upon through embedded systems all within centralized advisor hub |
| **Why It Matters** | Streamlines recruitment, reduces confusion, and builds trust early in the advisor journey. | Accelerates onboarding, reduces manual errors, and ensures advisors are ready to sell faster. | Improves training completion rates, reduces support burden, and enhances advisor confidence. | Enhancing these systems will empower advisors, accelerate sales through smarter lead matching, and foster loyalty through recognition and support. Embedded feedback and practice management support will drive continuous growth & retention, while stronger MGA-Manulife collaboration will build a high-performing, future-ready network. |

Manulife

INTERNAL

# Awareness & Recruitment

## Current State

### Actions

- Applies via Manulife's career portal, MGA recruitment channels (e.g., Financial Horizons, PPI), or National Accounts (e.g., HUB Financial).
- Attends live webinars or training sessions to get contracted (WFG only).
- Advisors discover Manulife through the Advisor platform, existing relationships with senior advisors or MGAs, sales events featuring specialists, or direct connections facilitated with tenured advisors.

### Pain Points

- Repetitive interviews, slow coordination.
- Unclear commissions and timelines.

## Future State Initiatives

### High Priority

- Portal with real-time application status, email updates, MGA-branded webinars showcasing Manulife's value proposition.
- Provide a clear, advisor-facing guide (e.g., via Manulife's portal or MGA welcome kit) detailing commission splits, bonuses, and incentives (e.g., first-year vs. renewal commissions) before the offer stage

### Medium/Low Priority

- Design a single, virtual interview day with Manulife, MGA, and National Account representatives, using a shared evaluation rubric. Provide pre-interview guides via the portal.
- Develop a unified recruitment platform (e.g., Workday with MGA/National Account API integration) co-designed with MGAs and advisors. Include a **candidate journey map** visualizing stages (apply → assess → interview → offer) with estimated timelines

# Contracting & Licensing

## Current State

### Actions

- Register on APEXA or Manulife web app.
- Submit licensing and background checks.
- Wait for approval and receive code.

### Pain Points

- Incorrect package selection by advisors/MGAs in APEXA.
- Complex interface in APEXA for first-time users.
- Missing attachments in the web application.
- APEXA lacks functionality for work distribution and reporting.
- MGAs have limited visibility into advisor-submitted applications.
- Advisors bypass MGA spot checks, risking compliance.
- Frequent submission of NIGO (Not In Good Order) documents.
- Non-MGA advisors rely on Manulife for manual verification.
- Unreliable system performance due to tech outages.
- Manual processing increases workload for Manulife teams.
- Long approval times caused by delays in license and background checks.
- Complicated setup of advisor codes in DSS.
- Legacy Lotus Notes application suffers from low adoption.

## Future State Initiatives

### High Priority

- **Onboarding kit:** Design an advisor-friendly (digital guide + 5-minute interactive tutorial) embedded in Manulife's welcome email. Include a checklist for licenses and background checks.
- **Real-Time Compliance Dashboard Integration:** Show license status and background check progress, with milestone notifications like "License Verified!"
- **Single Background Check & Automated License Validation:** This feature streamlines onboarding by consolidating multiple verification steps into one seamless process. Advisors can securely submit their credentials, while the system automatically validates licenses against regulatory databases saving time, reducing errors, and ensuring up-to-date compliance.

### Medium/Low Priority

- **Dedicated Compliance Liaison:** Assign a Manulife contact to guide advisors for registration and licensing.
- **Dedicated Chat Tool (e.g., Teams)**: Provides real-time support during onboarding.
- **Tailored Advisor Notifications:** Configure advisor-friendly alerts for compliance deadlines via email or a portal.

# Onboarding & Training

## Current State

### Actions

- Register on advisor portal.
- Attend product and digital tool training.
- Receive welcome emails and join webinars.

### Pain Points

- Frequent technical glitches disrupt advisor access and usability.
- Information overload during onboarding leads to confusion and inefficiency.
- Unclear roles and responsibilities between Manulife and MGAs create support gaps.
- Outdated content in the Advisor Portal reduces trust and relevance.
- Difficult navigation and inaccurate information in the portal hinder advisor productivity.
- Manual entitlement validation in DSS causes delays in accessing the Advisor Portal.

## Future State Initiatives

### High Priority

- **Advisor Portal Redesign:** Rebuild the portal's structure and navigation around advisor tasks—delivering a streamlined, intuitive interface that simplifies workflows and accelerates productivity.
- **Centralized Advisor Hub:** A digital platform consolidating training resources, product education, and CE credit modules to streamline learning and reduce information overload.
- **Tailored Onboarding Checklists**: Structured, role-specific checklists for MGAs and advisors to ensure a smooth and complete onboarding experience.

### Medium/Low Priority

- **Product Training & Activity Monitoring:** Analyze advisor digital behavior to identify training gaps and recommend targeted support.
- **Manulife-Specific Tech Guides for MGAs:** Equip MGAs with CRM and portal troubleshooting guides to reduce reliance on Manulife's IT team.

# Enablement & Engagement

## Current State

### Actions

- Meet 1-on-1 with assigned BDCs for coaching and training.
- Learn and apply Manulife products and services.
- Join webinars and provide feedback through portal tools.
- Engage with Manulife to gain new clients and grow their book.
- Participate in recognition programs and advisor communities.
- Reach out for support and escalate issues when needed.

### Pain Points

- Lack of visibility into completed, pending, and upcoming onboarding tasks.
- Advisors unsure whether to contact MGA or Manulife for support.
- Poor communication loops and unclear escalation paths.
- Limited peer learning and recognition opportunities.
- No centralized platform for ongoing advisor engagement.

## Future State Initiatives

### High Priority

- **Practice Management Hub:** Extend the Centralized Advisor Hub to include space for advisors to manage business development, commission schedules, licensing, and product entitlements—providing full transparency and control in one place.
- **Distributor Insights Hub:** A dedicated portal for MGAs and National Accounts to track advisor onboarding, growth opportunities status, and transactional status'—enabling joint business planning and proactive growth management.
- **CRM-Driven Lead Allocation:** Use analytics to match advisors with warm leads based on readiness and market fit.
- **Tailored Recognition Program:** Celebrate milestones like first sale or client satisfaction with rewards and visibility.

### Medium/Low Priority

- **Advisor Community Platform:** Enable peer learning and collaboration via Teams or a dedicated forum.
- **Integrated Feedback Loop:** Capture advisor input directly within the portal to improve tools and support.
- **Onboarding Metrics Dashboard:** Track advisor progress and engagement across HR and MGA teams.

# Plan of Attack

| 2026 | | | 2027 | | | 2028 | | |
|---|---|---|---|---|---|---|---|---|
| **Initiative** | Effort | Impact | **Initiative** | Effort | Impact | **Initiative** | Effort | Impact |
| **AP Redesign:** Streamlined hub for managing relationships, tracking progress, and accessing essential tools. With a refreshed interface and intuitive navigation, the portal empowers advisors to work more efficiently, stay organized, and deliver personalized support. | M | H | **Automatic enrollment:** create Advisor accounts for upon onboarding, send out email for password creation | H | H | **Distributor Insights Hub:** A dedicated portal for MGAs and National Accounts to track advisor onboarding, growth opportunities status, and transactional status'—enabling joint business planning and proactive growth management. | H | H |
| **Practice Management Hub**: Extend the Centralized Advisor Hub to include space for advisors to manage business development, commission schedules, licensing, and product entitlements—providing full transparency and control in one place. | M | H | **Fully digitized contract process:** full digital contract creation and delivery process with advisor visibility | H | H | **Support Routing Logic:** Intelligent system that directs advisor queries to the correct team (MGA or Manulife) based on issue type. | H | H |
| **Sales Enablement:** Use real-time analytics and advisor intent signals to support targeted outreach and improve advisor interactions.. | L | M | **Single Background Check & Automated License Validation:** This feature streamlines onboarding by consolidating multiple verification steps into one seamless process. | M | H | | | |
| Design an advisor-friendly **onboarding kit** (digital guide + 5-minute interactive tutorial) embedded in Manulife's welcome email. Include a checklist for licenses and background checks. | L | M | **Salesforce Driven Lead Allocation Engine:** Matches advisors with warm leads based on readiness, specialization, and market fit. Tailor content and engagement based on advisor preferences and historical activity to support both new and tenured advisors. | L | H | | | |
| **AP MyBusiness section improvements:** Clear distinction between new and seasoned advisors | L | M | **Dedicated Support:** Provide a dedicated chat tool (e.g., via Teams) for real-time support for onboarded advisors. | L | M | | | |
| **Recognition Program:** Celebrate milestones like first sale or client satisfaction with rewards and visibility. | M | H | **Find a Wholesaler:** Improve and redesign FAW | | | | | |

Manulife

INTERNAL

# Mass Market New Business Insurance Journey

# **Mass Market Sales Goal:** To create a Mass Market sales experience with no/few touchpoints and manual processes, increasing the sales funnel while decreasing costs

## Biggest Barriers

- Our existing process is highly manual and geared towards guided applications, which limits the amount of Mass Market policies we can sell at any given time
- Our digital experiences are not easy to navigate or self-serve due to outdated platforms and limited digital capabilities
- Vitality is not used as a value proposition by advisors due to the issues customers experiences onboarding, which often result in more work for them

## Opportunities

By focusing on a sales experience with few front end touches and no Manulife touchpoints, we can:

- Enable advisors to sell our products in less time and with significantly less effort
- Help clients decide and purchase policies more quickly
- Service more clients at any given time, widening the sales funnel at the intake level
- Set the expectations for a friction-free experience for new customers
- Reduce internal efforts significantly by increasing straight through processing with dynamic smart forms for in-force policy management

## Our Big Bets

By transforming our process for low complexity Mass Market clients, we can decrease the cost and effort for manual interventions, take advantage of existing data to work towards a fully integrated system, and help advisors navigate and sell Manulife products

1. **Instant Approval & Auto-Issue:** Enable fully automated underwriting and straight-through processing for qualifying Mass Market policies—delivering immediate approval and issuance to eliminate delays and manual intervention.
2. **Dynamic Digital Applications:** Transform static forms into smart, pre-filled, and error-proof digital applications that validate data in real time—reducing NIGO rates and accelerating advisor workflows.
3. **Integrated Advisor Experience:** Unify INS tools into a single, contained, intuitive platform—giving advisors one destination for Client opportunities, product info, quoting, applications and tracking decisions, while improving transparency and efficiency.
4. **Automated Client Setup & Welcome:** Automatically create Manulife ID, provision CSS access, and deliver contracts via eDocs—followed by a personalized welcome experience that reinforces trust and readiness for self-service.

# Mass Market INS Sales Blueprint

## Low-touch/no-touch journey with integrated tools & processes automation

User engagement point

Backstage action

| | PRE-SALE | | SALE | | POST-SALE & MAINTENANCE | |
|---|---|---|---|---|---|---|
| **Advisor/Client interaction** (frontstage) | Assesses client (Advisor)<br>Understand Needs (Client) | Understand Needs (Client)<br>Provide quote and illustrations | Submit pre-filled digital application | Client receives contract via e-delivery<br>Advisor receives PHI protected copy | Customer receives welcome packet and email with login for CSS and Vitality | Customer self-serves on CSS with immediate changes |
| **Future State** | Advisors gain streamlined access to key tools Rates to Go, Insure Right, product catalog, rate engine, CIAM, and training through a unified backend. Role-based permissions and CRM integration ensure secure, context-aware support for efficient client assessments. | The illustration tool is embedded directly within CRM and DDA, enabling real-time rate updates, version control, and intelligent product recommendations. Powered by client data, it supports side-by-side product comparisons, streamlining advisor workflows and enhancing decision-making. | Digital applications are auto-validated through AI UW & licensing, AI underwriting instantly Approves (Y/N), reasoning and decisions are captured for ongoing management, applications are synced with eTrack, Advisors receive real-time updates, ensuring immediate awareness of issuance or next best offer within minutes of applying. | Approved Policies are Auto issued, immediately going inforce. Policies contacts are bundled and securely stored in CRM, then delivered via an eDocs for Clients (CSS) and Advisors (AP). Deep links are transfer to Welcome email | Manulife ID is created and linked automatically, while DSS and Salesforce instantly validate client and policy data. Seamless integration across platforms ensures a smooth onboarding experience and accurate data flow. | CRM syncs client data across CSS & My Clients, enabling self-serve policy management features while Inforce documents (eDocs) are auto-managed in secure storage. |

**High Priority Initiatives**

INTERNAL

# **Mass Market sales Future state blueprint Vision-** Streamline the advisor-client sales journey by integrating intelligent tools and real-time data to improve efficiency, reduce errors, and accelerate growth.

| | PRE-SALE | | SALE | | POST-SALE & MAINTENANCE | |
|---|---|---|---|---|---|---|
| **Advisor/Client interactions** | AI-driven client profiling and needs assessment | Advisors use a CRM-integrated tool to instantly generate personalized quotes and illustrations with version history, product comparisons, and secure sharing options | Advisors submit digitally validated applications with real-time error checks and instant routing to underwriting, all within a unified platform | Advisors trigger automated contract delivery with tracking and receive confirmation once signed. | Advisors guide clients through a unified onboarding flow where ID creation and policy linking are automated and validated in real time. | Advisors access a unified dashboard with real-time visibility into client data, policies, and documents all securely stored and permission-controlled. |
| **Orchestration Layer (Backstage actions)** | Unified access to product catalog, rates, training via single sign-on. Context-aware recommendation engine | Illustration tool is embedded within CRM and DDA, with real-time rate updates, version control, and intelligent product recommendations and compare powered by client data. | DDA (Digital Application) is auto-validated through AI UW Tool, routed to underwriting for instant approval. Advisors get instant confirmation and Manulife ID details shared with customers, with status synced in eTrack, advisors receive real-time updates and alerts via eTrack | Policy is bundled, stored in Edocs, Auto issue skips the need for follow-up and signatures; real-time status updates and alerts are sent to advisors through eTrack. Unapproved policies are redirected back with a next best offer to focus on providing adequate risk & coverage | Client Manulife ID is created **or** linked automatically; MDM, DSS and Salesforce validate client and policy data instantly, with seamless integration across platforms. | CRM syncs client data across CSS, MyClients and Inforce documents. Client have simple self serve capabilities that keep the advisors informed. Advisors receive notifications via the opportunities dashboard for improved policy lifecycle management |
| **Gaps to be filled** | CRM-integrated AI engine automatically builds client profiles using real-time data, enabling personalized, context-aware product recommendations across a unified platform. | Eliminates tool fragmentation, adds version tracking and product comparison, and simplifies quote generation with intuitive, integrated workflows. | DDA are auto-validated in real time, with built-in NIGO checks and live underwriting status updates, giving advisors full visibility and reducing delays. | Lack of alerts, backend delays, and manual processes are replaced by automated contract delivery with real-time tracking, confirmation, and seamless advisor notifications. | A unified onboarding flow automatically creates and links Manulife ID with policy data, using real-time validation to eliminate confusion and ensure accuracy. | Advisors access a unified platform where client data, documents, and policy admin are instantly available—eliminating manual uploads, platform switching, and delays. |
| **Why It Matters** | Delivers personalized experiences, boosts advisor efficiency, and improves conversion through smarter, data-driven recommendations. | Streamlined quoting improves advisor efficiency, enhances client trust through personalized recommendations, and accelerates conversion with faster, error-free workflows. | Improves speed and accuracy, reduces NIGO errors, and keeps advisors informed with real-time underwriting visibility. | Ensures timely contract delivery, reduces manual errors, and improves advisor-client coordination with real-time visibility and confirmation. **For MM, we always make an offer.** | Simplifies onboarding, reduces errors, and improves client experience with faster, more accurate policy setup and fewer manual steps. | Centralized access improves efficiency, reduces delays, and enables advisors to manage client relationships with full visibility and confidence. |

Manulife

# Pre-Sale Phase Overview

## Current State

### Actions

Clients reach out to advisors through existing relationships, local recommendations or online

Clients and advisors work together to find what product works best for their needs

Advisors use Manulife Illustrations to provide clients with a preview of their premiums and coverages

### Pain Points

**Find an Advisor is not a great experience** to help clients find them right advisor for them

**Manulife doesn't actively help advisors find new leads**, limiting the client potential for advisors

**Lack of expertise in Manulife products** and materials to help advisors and client make decisions

**Illustrations** is cumbersome and difficult to use

Advisors don't see **Vitality as a value differentiator** due to its well-known onboarding issues

## Future State Initiatives

### High Priority

- **Integrate advisor tools**: reduce duplication of work by integrating quotes, illustrations, and application throughout the process
- **AI lead generator**: use AI to identifying opportunities for coverage improvements from existing client blocks
- **Redesign 'Find an Advisor':** Complete the follow through with prospective clients to ensure their coverage needs are adequately met with our products through trusted representatives

### Medium/Low Priority

- **Incentives to promote Vitality:** provide advisors with incentives for Vitality policies sold, and provide better value content and assistance for Vitality customers to reduce load from advisors
- **Clear content strategy:** create a content strategy that present simplified, helpful, and personalized content throughout the client and advisor journey
- **Enhance Illustrations:** make improvements for a more efficient workflow as advisors work to make illustrations for clients

# Sale Phase Overview

## Current State

### Actions

Advisors and clients fill out application form

% of applications are approved within the first hour, and the rest go through manual underwriting

For manually underwritten applications, advisor received communications from Manulife via email, phone, or secure inbox with requests for more information

If approved, client receives contract via email to be signed electronically

Advisor receives a notice in Advisor Portal that contract was delivered

### Pain Points

**Paper forms are static** and usually require follow-up questions to be sent out after application is submitted

The manual **application process is complex and time consuming** for internal teams

Interactions with advisors and case coordinators, underwriters, and wholesalers are not tracked or standardized, and **advisors lack a repository and tracker for process and communications**

**Advisors want to receive client contracts**, which now go directly to the client in order to protect PHI and ensure receipt of full contract

## Future State Initiatives

### High Priority

- **Pre-fill application data:** leverage known client data from pre-sales phase and existing customers to simplify the application form
- **Instant approval, Auto issue**: increase policies that qualify for AI underwriting
- **Enhanced AI Underwriting**: Increase reasoning capabilities to enable a broader range of decisions aimed at covering 100% of mass market defined policies
- **Suggest alternate product**: In case of denial, use application data to suggest alternative product offer to advisor
- **Client Welcome Experience:** Deliver a personalized welcome email and notification that confirms policy activation, Manulife ID setup, and contract availability in eDocs—creating a warm, seamless entry into our ecosystem after all backend processes are complete.

### Medium/Low Priority

- **Fully digitized contract process:** full digital contract creation and delivery process with advisor visibility
- **Update digital application**: Fully digitized, dynamic application forms to simplify and speed up application process
- **New servicing dashboard:** build a dashboard for clients and advisors to see clear progress, requests, and communications from all Manulife teams throughout the application and in-force phases

# Post-Sale & Maintenance Phase Overview

## Current State

### Actions

Customer may look through contract and advisor materials to find information on creating a CSS account and register for Vitality

Customer may self-serve payment and address changes

Customer reaches out to advisor with requests for policy changes, may fill out static PDF forms to be manually processed

### Pain Points

There is **no welcome communications to customer**, leading to confusion for next steps and lack of capabilities for engagement and cross-selling

**No clear next steps for Vitality** registration, and advisors end up having to put in extra effort with Vitality policies, which can limit their advantages for selling Vitality policies

Many **in-force change requests are processed manually** from static forms, leading to a lot of back and forth between Manulife, advisor, and customer for more information due to NIGO forms

## Future State Initiatives

### High Priority

- **Automatic enrollment:** create CSS and Vitality accounts for customer upon joining, send out email for password creation
- **CSS self-serve capabilities**: increase smart forms and straight through processing capabilities for in-force changes

### Medium/Low Priority

- **Personalized welcome kit:** send email and physical welcome packet with relevant information about their online accounts and value proposition
- **New Vitality support:** new experience to guide customers as they register and troubleshoot Vitality issues
- **Vitality Upgrade Nudges:** Deploy targeted campaigns and behavioral nudges during the two-year conversion window to encourage clients—and equip advisors—to upgrade policies from **Go** to **Plus**, driving higher engagement and long-term value.

# Plan of Attack

INTERNAL

# Guaranteed Wealth Solutions Journey

# **Mass Market GWS Sales Goal:** To create a Mass Market sales experience with no/few touchpoints and manual processes, increasing the sales funnel while decreasing costs

## Biggest Barriers

- **Manual, Fragmented Onboarding-**Advisors must enter the same client data across multiple systems, slowing onboarding and increasing frustration.
- **High NIGO Rates & Compliance Ris**k-Disconnected tools and manual paperwork lead to frequent "Not In Good Order" submissions and increased compliance exposure.
- **Low Tool Adoption & Fragmented Experiences**-Multiple portals with separate logins and duplicate data entry reduce usability and increase training complexity.
- **Advisor Productivity Drain**-Advisors spend excessive time chasing forms and fixing errors, diverting focus from client engagement.
- **Lack of Transparency & Visibility**-Limited status tracking for onboarding and servicing leads to rework and increased support calls.
- **Limited Client Self-Service**-Clients depend heavily on advisors and call centers for basic tasks, adding operational cost and bottlenecks.

## Opportunities

By focusing on a sales experience with no/few Manulife touchpoints, we can:

- **Streamline New contract creation,** accelerating the set-up of clients and their assets
- **Fully digitize OLT** to reduce NIGO Rates through Smart Validation
- **Unify Advisor Tools** into a Single Platform
- **Combine MySegfunds with MyClients** to reduce cost and maintenance.
- **Boost Advisor Productivity** with Intelligent Workflows
- **Enhance Transparency** with Real-Time Status Tracking
- **Enable Client Self-Service**

## Our Big Bets

By transforming our process for low complexity Mass Market clients, we can decrease the cost and effort for manual interventions, take advantage of existing data to work towards a fully integrated system, and help advisors navigate and sell Manulife products

- **Value Prop & Marketing Material**
  - Clear and targeted value prop, strategy and storyline to our advisors
- **Robust Funds Platform**
  - Enable GWS Illustration of various funds/products to ensure seamless access to investment options, product comparison and resources
- **OLT Enhancements (Advisor)**
  - Streamline digital transaction process
- **Tools integration**
  - Integrating tools to enhance operational efficiency and findability
- **Unified Role based Dashboard**
  - Offering a centralize view for managing task, performance, and client interactions

# Mass Market GWS Sales Blueprint

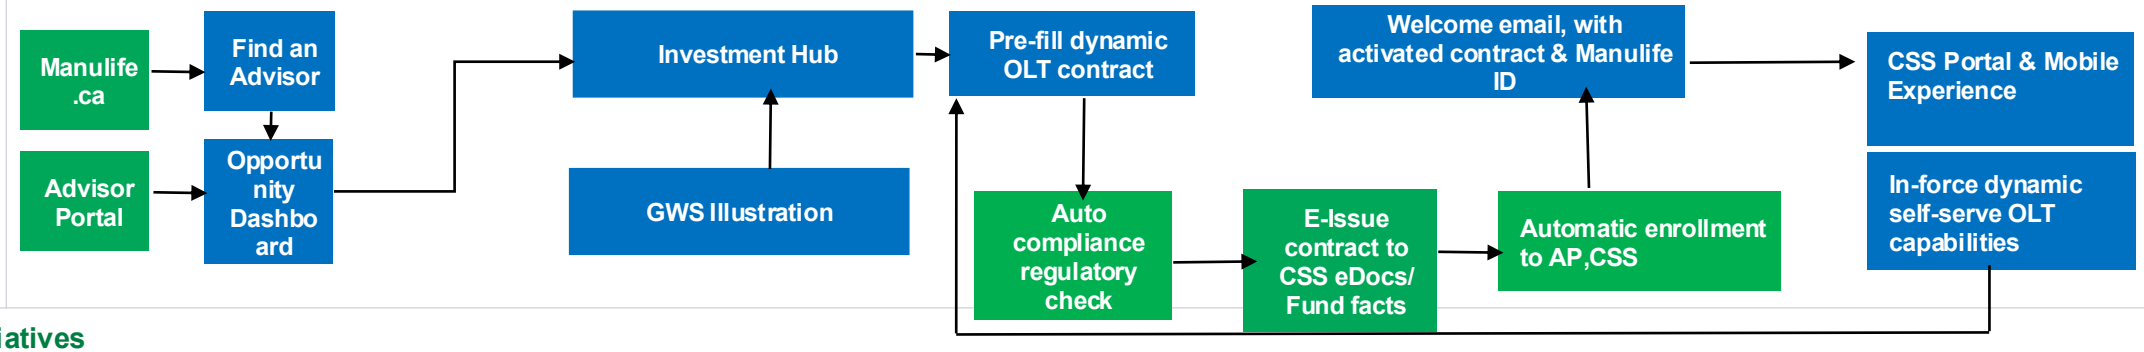
## Low-touch/no-touch journey with integrated tools & processes automation

User engagement point

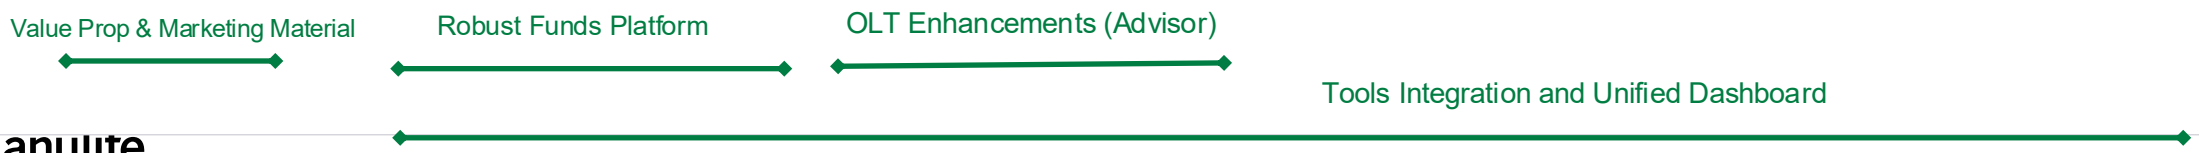
Backstage action

| | PRE-SALE | | SALE | | POST-SALE & MAINTENANCE | |
|---|---|---|---|---|---|---|
| **Advisor/Client interaction** (frontstage) | Assesses client (Advisor)<br>Understand Needs (Client) | Understand Needs (Client)<br>Provide quote and GWS illustrations | Submit pre-filled digital application | Client receives contract via e-delivery | Customer receives welcome packet and email with login for CSS | Advisor self-serve on AP, Customer self-serves on CSS with immediate changes |
| **Future State** | Advisors gain streamlined access to key tools GWS Illustration, OLT, product catalog, rate engine, CIAM, and training through a unified backend. Role-based permissions and CRM integration ensure secure, context-aware support for efficient client assessments. | The **GWS illustration** tool is embedded directly within INV Hub and OLT enabling real-time rate updates, version control, and intelligent product recommendations. Powered by client data, it supports side-by-side product comparisons, streamlining advisor workflows and enhancing decision-making. | **Digitally enhance OLT** as a single-point data entry ensures client info is contextually aligned with the product setting clear purchase expectations. Addressing gaps like exception handling, personalization, and integration ensures a smoother, more reliable client experience | Contracts are bundled and securely stored in CRM, then delivered via an e-signature platform. Advisors receive real-time status updates and alerts through eTrac, ensuring timely visibility and reducing manual follow-ups. | Manulife ID is created and linked automatically, while DSS and Salesforce instantly validate client and policy data. Seamless integration across platforms ensures a smooth onboarding experience and accurate data flow. | CRM syncs client data across My Clients, while Inforce documents (eDocs) auto-managed in secure storage . Role-based access ensures instant, secure retrieval for advisors, reducing manual effort and improving efficiency. |

**Process map**



**High Priority Initiatives**



Manulife

# **Mass Market sales Future state blueprint Vision-** Streamline the advisor-client sales journey by integrating intelligent tools and real-time data to improve efficiency, reduce errors, and accelerate growth.

| | PRE-SALE | | SALE | | POST-SALE & MAINTENANCE | |
|---|---|---|---|---|---|---|
| **Advisor Interaction (Frontstage Actions)** | AI-driven client profiling and needs assessment | Advisors use a CRM-integrated tool to instantly generate personalized quotes and illustrations with version history, product comparisons, and secure sharing options | Advisor initiates product fit through contained IHUB Advisors submit digital applications with real-time error checks within a unified platform. | Advisors trigger automated contract delivery with tracking and receive confirmation once signed. | Advisors guide clients through a unified onboarding flow where ID creation and policy linking are automated and validated in real time. | Advisors access a unified dashboard with real-time visibility into client data, policies, and documents all securely stored and permission-controlled. |
| **Orchestration Layer (Backstage actions)** | Unified access to product catalog, rates, training via single sign-on. Context-aware recommendation engine | GWS Illustration tool is embedded within INV Hub feeding into OLT, with real-time rate updates, version control, and intelligent product recommendations and compare powered by client data. | Delivers a consistent, product-focused advisor experience with integrated client-fit tools and a digitally enhanced OLT. Single-point data entry ensures client information aligns with product context, setting clear expectations and driving efficiency | Policy is bundled, stored in DSS and delivered via secure e-signature platform; real-time status updates and alerts are sent to advisors through eTrack.. | Manulife ID is created and linked automatically; DSS and Salesforce validate client and policy data instantly, with seamless integration across platforms. | CRM syncs client data across MyClients and Inforce documents are auto-managed in secure storage , eDocs, with role-based access and instant retrieval. |
| **Gaps to be filled** | CRM-integrated AI engine automatically builds client profiles using real-time data, enabling personalized, context-aware product recommendations across a unified platform. | Eliminates tool fragmentation, adds version tracking and product comparison, and simplifies quote generation with intuitive, integrated workflows. | OLT is auto-validated in real time, with built-in NIGO checks and status updates, giving advisors full visibility and reducing delays. | Lack of alerts, backend delays, and manual processes are replaced by automated contract delivery with real-time tracking, confirmation, and seamless advisor notifications. | A unified onboarding flow automatically creates and links Manulife ID with policy data, using real-time validation to eliminate confusion and ensure accuracy. | Advisors access a unified platform where client data, documents, and policy are instantly available—eliminating manual uploads, platform switching, and delays. |
| **Why It Matters** | Delivers personalized experiences, boosts advisor efficiency, and improves conversion through smarter, data-driven recommendations. | Streamlined quoting improves advisor efficiency, enhances client trust through personalized recommendations, and accelerates conversion with faster, error-free workflows. | Improves advisor efficiency and ensures consistent product delivery by streamlining data entry and aligning client needs with product context. | Ensures timely contract delivery, reduces manual errors, and improves advisor-client coordination with real-time visibility and confirmation. | Simplifies onboarding, reduces errors, and improves client experience with faster, more accurate policy setup and fewer manual steps. | Centralized access improves efficiency, reduces delays, and enables advisors to manage client relationships with full visibility and confidence. |

Manulife

# Pre-Sale Phase Overview

## Current State

### Actions

- Manulife Advisors connect with clients through various channels such as existing relationships, referrals, promotional events, and cold calls.
- Advisors benefit from Manulife's reputable brand, strong product performance, and sales support.
- Manulife facilitates connections between clients and experienced advisors, often through sales events and strategic engagements
- The Associate Advisor Program involves attending conferences, independent education, call center training, contracting, client consulting, and using OLT for transactions, which transitioned from paper to online with Manulife training.

### Pain Points

- Unclear mission and purpose due to lack of product offerings.
- No tools for wholesaler search or visitor tracking.
- Poor navigation, ad budget limits, and social media constraints.
- Inaccurate CRM data, content not advisor-focused.
- Aging advisor base with fewer new entrants.
- Focus on product launches over advisor needs; limited wholesaler support.
- Advisors carrying fewer products.
- Many advisors are unaware of or reluctant to use digital tools, with poor onboarding and low usage of platforms like OLT, Mysegfundsbook, Myclients.

## Future State Initiatives

### High Priority

- **Sales Enablement**: Use real-time analytics and advisor intent signals to support targeted outreach and improve advisor interactions. GWS illustration suggest tailored product fit assessment.
- **Personalized Advisor Experience:** Tailor content and engagement based on advisor preferences and historical activity to support both new and tenured advisors.
- **Smart Search:** AI driven smart search for effectively find content and navigation
- **Centralized Advisor Hub:** Advisors can view client activity, manage tasks, and track performance all from a single, streamlined interface designed for efficiency and clarity.
- **New GWS funds illustration tool** to compare products, funds and decision making.

### Medium/Low Priority

- A client education center focused on funds can support financial wellness conversations, while automated training prompts for unused tools ensure continuous learning.
- A comprehensive advisor onboarding journey covering products, tools, CE credits, client maintenance, and support paired with ongoing digital tools training, will drive long-term adoption and effectiveness.
- Structured onboarding checklists for MGAs and advisors will ensure consistent setup, reduce errors, and accelerate readiness.
- AI-powered product insights based on advisor's past activity and market trends. Increase engagement & lead conversion.
- Real-time analytics feeding sales team with advisor intent signals. Enable targeted outreach & better advisor experience.

# Sales Phase Overview

## Current State

### Actions

Recommend suitable GWS product to clients. Advisor establish a relationship with clients, with the intent to make clients happy with financial solutions

### Pain Points

- Lack of OLT training leads to frequent errors, advisors unaware of NIGO issues.
- Advisors favor paper for ease and client interaction; digital tools disrupt flow.
- Multiple platforms and inconsistent CSR info cause confusion.
- Poor call routing and transparency; delayed NIGOs.
- Frequent outages and seasonal delays increase paper use and call volumes.
- Indexing errors and long resolution times hinder workflows.
- No single view of client investments (household view) missing

## Future State Initiatives

### High Priority

- **OLT Enhancements (Advisor)**-Streamline digital transaction process. Emphasis on fully digital application and maintenance submissions via OLT, especially for Seg Fund processing.

#### Across All Phases (Pre-sales, Sales and Post Sales)

- **Tools integration- Integrating tools to enhance operational efficiency and findability-** Link tools like OLT, eDocs, eTrac, and MyClients to auto-populate data across forms and user tasks. Enable through a shared data layer and single sign-on, transforming disparate tools into an integrated digital ecosystem.
- **Unified Role based Dashboard (Advisor)**-Offering a centralize view for managing task. Smart nudges, product suggestions, and alerts for investments, at-risk clients, and servicing, surfacing pain points and improving business coordination. Reducing demand across Call Centre, Sales, Tech, and Advisors.

### Medium/Low Priority

- Auto-link accounts where possible & provide manual linking option for advisors.
- Consolidate Mysegfundsbook and MyClients as a single tool.
- Enhancing collaboration between Sales and the Customer Centre will improve data transfer, issue resolution, and training.

# Post-Sales Phase Overview

## Current State

### Actions

Track inforce business, manage renewals and top-ups and addresses, servicing queries

### Pain Points

- Legacy systems, slow updates, and fragmented architecture cause frequent breakdowns.
- No centralized view across platforms (e.g., OLT, myclient, eTrack, eDocs, secure inbox).
- iFast and AWD are slow to resolve issues, reducing efficiency.
- Limited engagement between tech teams and advisors results in misaligned tools.
- Advisors mainly use digital tools during tax season, limiting feedback and support.
- No competitive portfolio management solution, ownership, or centralized content.
- No continuity or incentives when wholesalers leave.
- Focus on new product launches over advisor relevance and needs.

## Future State Initiatives

### High Priority

- **CSS Portal & Mobile Experience (Client) -** Facilitate ongoing client engagement and support. Omni-Channel Self-Service**,** Develop a client and advisor interface for viewing and managing accounts, downloading statements, and tracking fund performance. Gamified Engagement, uses gamification to enhance client experience, encourage asset growth, and share progress with advisors

### Medium/Low Priority

- Enhance advisor support and client servicing through better data and automation. Leveraging enriched advisor insights.
- Automating renewal outreach and servicing notifications will streamline follow-ups and reduce manual effort.
- Tracking post-sale success through KPIs like advisor/client NPS, first call resolution, and renewal retention rates will provide valuable feedback to continuously improve the experience.
